Aeris

Why we get up in the morning.

It was about time to reinvent the way we work and live. So that's just what we did.

The issue: We sit too much and don't move enough. This is detrimental to our health. The lack of activity robs us of our concentration, energy and creativity, even after a short amount of time.

The solution: Aeris is driven by the goal of keeping our bodies in constant movement. Our products and concepts contribute to an active and healthy lifestyle. They enable movement in precisely the areas where it's least expected, but where it's needed the most – when sitting.

We are your secret ingredient for a more active, healthier and subsequently happier life.

Aeris - Never just sit.

Never just sit.

Why extra movement is key.

We all know that it is essential to lead an active and conscientious lifestyle. Healthy diet and mindfulness make it easier to navigate all of the big and small challenges that life throws at us on a daily basis.

Riding a bike, jogging or regularly going to the gym are all important and the right steps to take. However, they are merely a drop in the ocean if you take into consideration the fact that we spend most of our days in relative immobility, moving from one form of sitting to another. And who doesn't crave for a cup of coffee in the afternoon. Or perhaps a piece of chocolate. Often both. "

We don't have anything against coffee or chocolate, in fact we love both. But we are against motionless sitting, which makes you tired and sick. This is why we have created products to enable you to remain active whilst seated – no effort required. Promise.

Want to know how that feels? Just give it a try. Ideally whilst you still have the energy to get out of your old chair.

Movement throughout the day with no effort involved.

Aeris is driven by developing products and concepts to keep our bodies moving throughout the day.

Sounds like a workout or another strenuous training method?

Not at all! In fact, the opposite is true. Your body makes all of the movements, which provide an array of positive health benefits by itself, without the need for any additional movement. There's no need to keep a treadmill under your desk or have a mini coach shouting in your ear. You can just get on with your work as usual.

Our movement technologies don't just cause an increase in movement; they also put a stop to a working world where everyone unnaturally sits at their desk without moving all day.

What we mean by true 3D technology.

For us, 3D technology doesn't have anything to do with a cinema screen, funny glasses or popcorn. When we mention 3D technology, we are referring to movement in all three dimensions: forwards and backwards, to the left and right and – uniquely with Aeris – movement in the third dimension, namely up and down. This third dimension is particularly important as it enables deeper breathing, stimulates the metabolism, promotes muscle development and keeps the intervertebral disks nourished.

We owe our undisputed leading position in the active chair sector to this 3D technology developed by Aeris 25 years ago for the Aeris Swopper. Practically everybody can benefit from its positive effects.

For example, when you breathe in and out, your kidney moves up to 10cm. This movement is essential to ensure good functioning. When you sit still, your body doesn't permit the kidney to move as required. The kidney therefore doesn't perform adequately, which naturally has repercussions for your entire body.

Sitting in all three dimensions.

Dimension 1: Up and down

It's not just the internal organs that oscillate in a natural rhythm; movement and relief also enable the intervertebral discs to stay fit and healthy. Just like a sponge, the intervertebral discs absorb and squeeze out fluids during movement. This ensures the intervertebral discs are optimally supplied with the required nutrients to help prevent and alleviate back pain.

Dimension 2: To the left and right

Move freely from your hips by leaning to the side. This enables you to reach far and ensures your back remains straight. Even when cheekily sneaking a biscuit from your colleague.

Dimension 3: Forwards and backwards

The forward tilt of the pelvis keeps the back straight. This enables deep breathing and improves your circulation. The joint located close to the floor enables your entire upper body to naturally lean forwards towards your desk.

In a nutshell: Actively sitting with Aeris 3D technology has a similar effect on our bodies as a relaxed walk. It constantly trains muscles effectively of their own accord, without us actively having to do anything.

This gives sitters a new lease of life, with less tiredness, more energy and an improved quality of life.

How we work.

When we say that we want to enable our customers to live happier and healthier lives, this includes the place where we live our lives: Our planet.

We might not be 100 % perfect yet, but we're constantly working on increasing our sustainability. We use these three principles to help us with this:

“Handmade in Germany” durability

We are firmly opposed to fast-furniture and throwaway society. All of our products are handmade in Germany to ensure the durability of our products. The high quality and long service life of our products can be confirmed by our customers who have sat and worked on our Swoppers for over 20 years. In the case that something doesn't function as intended, we're also more than happy to repair our products and replace individual parts.

“120 %” climate-neutral AERIS power

When we equipped all of our production facilities with solar cells at the turn of the millennium, lots of people called us crazy. Today, we supply solar energy not just to ourselves, but also to other households. We have also started to convert our vehicle fleet to electric vehicles.

Recyclable materials

We almost exclusively use completely recyclable materials which have been awarded with ecological and health safety certificates. We constantly scrutinise typical logistics challenges such as packaging, shipping and recycling and adjust our systems accordingly. In the name of our environment and planet.

Aeris Swoppper

Sit down, wake up, workout.

Many benefits. Simply good.

Give your back pleasure, not pain.

The up and down movement of the chair is similar to the natural movement when walking or running. This way your intervertebral discs are kept nourished and fit.

The result, your back can support itself using natural muscle strength – no backrest needed. And instead of tension you'll feel a sense of physical ease.

Workout instead of burnout – without sweating.

If your body can move freely, you can breathe more deeply. This stimulates circulation and metabolism. You'll feel fitter and more alert and burn more calories.

No more hunched back at your desk.

The chair's pivotal joint, which is close to the ground, and the spring ensure that with every movement your whole body will move. Even if you lean forward – to read a brochure on the benefits of the Aeris Swopper for example – your back will stay straight without any extra effort on your part.

- 01. **3D technology:** Gives you flexible sideways motion, extends your reach and ensures an optimum sitting posture with respect to the working surface. This keeps your muscles, intervertebral discs, tendons and joints fit.
- 02. **Vertical movement:** Relieves the intervertebral discs and stimulates the blood circulation and your oxygen flow.
- 03. **Convex seat:** The shape of the seat encourages a free and upright posture and prevents pressure points at seat edges.
- 04. **Sturdy footring:** Extremely stable, available with or without castors.

Setting options:

Seat height (gas spring)
User weight (spring hardness / up-and-down movement)
Flexible sideways movement
Optional: height of backrest

Technical Data:

Product weight:	11 kg without backrest, 17 kg with backrest
Footring:	Die-cast aluminium, powder coated, diameter: 55 cm without castors, 58 cm with castors
max. user weight:	max. 120 kg
Seat:	Seat support: plastic, upholstery: PU foam, diameter: 43 cm
Castor types:	Soft floor castors, hard floor castors according to DIN EN 12529
Swopper Air:	Breathable, pressure-regulating high-tech cushioning with five functional layers
Swopper Work:	Swopper plus backrest including castors fulfilling DIN EN 1335

How to choose the right spring:

Light I weigh under 50 kg	Standard This spring suits almost everyone	High I am over 185 cm tall	Low My desk is lower than 65 cm
I weigh under 50 kg		I weigh over 50 kg	

Awards and Certifications:

Aeris
3Dee

Because your mind works better when your body moves.

Many benefits. Simply good.

The best way to improve concentration is to keep your body moving.

By moving up and down, the body remains active and blood flow to all your organs – including the brain – is increased. This promotes concentration and strengthens your back

Brings life to sitting.

The Aeris 3Dee allows unrestricted movement, encourages deeper breathing and boosts circulation and metabolism. Thanks to the chair's pivotal joint being so close to the floor, your upper body can move in all directions, and the back remains naturally straight, even when you're leaning forward.

Freedom of movement.

Specially designed not to impede movement, the half-height backrest with lumbar curvature, slat technology and back-shaped cushion provides crucial support – without restricting movement. So even when you're sitting down, you can still move freely and easily.

- 01. **3D technology:** Gives you flexible sideways motion, extends your reach and ensures an optimum sitting posture with respect to the working surface. This keeps your muscles, intervertebral discs, tendons and joints fit.
- 02. **Vertical movement:** Relieves the intervertebral discs and stimulates the blood circulation and your oxygen flow.
- 03. **Patented backrest technology:** The half-height backrest with lamellar technology and physiologically shaped backrest provides support without restricting motion.
- 04. **Multi-zone integral foam:** The intelligent seat is slightly convex, encourages a free and upright posture and prevents pressure points at the front edge.

Setting options:

Seat height (gas spring)
User weight (spring hardness / up-and-down movement)
Flexible sideways movement
Backrest tension
Lumbar support (backrest)

Technical Data:

Product Weight:	20 kg
Star base:	Die-cast aluminium, powder coated, diameter: 75 cm
max. user weight:	120 kg
Castors:	Castors with brakes in compliance with DIN EN 12529 for all types of floors
Spring types:	Standard: body weight: < 50 – 120 kg, seat height with load 42 cm – 56 cm according to DIN EN 1335, High: body weight: 50 – 120 kg, seat height 45 cm – 59 cm with load
Seat:	Seat support: die-cast aluminium, powder coated with PU foam upholstery
Information:	The Standard spring is recommended for persons weighing less than 50 kg.

Aeris
Muvman

Sit down. Stand up. Do both at once.

Many benefits. Simply good.

The Aeris Muvman ensures you're awake to the tips of your toes.

The adjustable seat with Flexzone® technology promotes good blood circulation right down to your toes. The fixed base is fitted with non-slip rubber, providing a secure grip during movement (and it protects the floor too).

Good health relies on good posture.

The Aeris Muvman's flexible central column promotes constant micro movements to help keep the intervertebral discs supple. The chair's pivotal joint being so close to the floor ensures you remain in an upright position relative to the work surface. Supported this way, you can lean comfortably and safely in all directions.

Everybody welcome.

No other standing chair allows such a wide variety of height settings. Whatever your body size and whatever the height of the surface you are working at, sitting and standing positions can be adjusted to suit you individually. And thanks to its lightweight design, the chair can be easily moved around the office.

- 01. **Muvzone - the multidimensional movement element in the baseplate:** Provides maximum sideways movement, extends your reach and ensures an optimum sitting posture with respect to the working surface.
- 02. **Tilted centre column:** Relieves the intervertebral discs and encourages an upright posture with respect to the working surface.
- 03. **Convex seat with flexible front edge:** The shape of the seat encourages an upright posture and the flexzone prevents pressure points at seat edges.
- 04. **Sturdy baseplate:** Extremely stable with no danger of toppling.
- 05. **Carrying handle:** Practical handle for carrying the Muvman to wherever it is needed.

Setting options:

Seat height (gas spring)

Technical Data:

Product weight:	6.3 kg Version High: 6.5 kg
Baseplate:	Glass fibre reinforced plastic, diameter: 38 cm
Seat height:	51 – 84 cm Version High: 60 – 93 cm
max. user weight:	120 kg

Aeris
Oyo

A chair and its user rarely suit each other this well.

Many benefits. Simply good.

Happiness included.

When the body is active, the mind can find its equilibrium. In a meeting, if you can keep your body moving, your thoughts will be more focused and it's more fun.

Sit how you like, where you like.

The Aeris Oyo keeps you moving. You can sit in it any way you want – with the backrest behind you, to the side or even in front. With the Aeris Oyo, there's always more than one way to sit.

Easy on the body, easy on the eye.

Your body and the Aeris Oyo – two design elements, as if cut from the same cloth, co-existing in exquisite harmony. Yin and yang. Hip and hop. You and your Oyo.

01. Rocking chair with three sitting positions: Forward, sideways and backwards.

02. Skid base made of cantilever steel.

03. PU foam upholstery

04. Universal skids for all types of floors

Design: Martin Ballendat

Aeris Swopposter

The anti couch potato for kids.

Many benefits. Simply good.

Now even sitting is fun.

Children's curiosity knows no bounds. So isn't it better if the chair moves when the child moves? On the Aeris Swoppster, the child can spontaneously follow any impulse as and when it arises, without restriction of freedom of movement. Wee ones can straighten up with a free diaphragm ready to burst out laughing any minute.

Children can do whatever they want – even walk while sitting.

With its flexible design, the Aeris Swoppster promotes spinal mobility. The up and down movement of the chair is similar to the natural movement when walking or running. This strengthens the back and muscles.

Swopping makes you smarter.

Movement promotes neuronal networking in the brain and thus mental development. Sitting on the Aeris Swoppster, the brain is optimally supplied with blood and oxygen, so kids can concentrate much better on learning. What was that again? 2×3 equals 4 ...?

Grows without putting down roots.

The Aeris Swoppster is height-adjustable and can grow with the child.

- 01. **3D technology:** Gives you flexible sideways movement, extends your reach and ensures an optimum sitting posture with respect to the desk.
- 02. **Vertical movement:** Relieves the intervertebral discs and stimulates the blood circulation.
- 03. **Convex seat:** The shape of the seat encourages a free and upright posture and prevents pressure points at seat edges.
- 04. **Sturdy footring:** Extremely stable with no danger of toppling. Castors and glides are included.
- 05. **Removable cover**

Setting options:

Seat height (gas spring)
User weight (spring hardness / up-and-down movement)
Flexible sideways movement

Technische Details:

Product weight:	5.7 kg
Footring:	Glass fibre reinforced plastic, diameter: 52 cm with glides, 48 cm with castors
Seat height:	32 – 47.5 cm
Seat:	Seat support: plastic, upholstery: PU foam
Spring colour:	Light grey metallic
max. user weight:	50 kg

Aeris
Muvmat

A walk in the woods – on half a square metre.

Many benefits. Simply good.

Increased focus and concentration.

From the very first use, the standing mat has been proven to improve the short and long-term ability to concentrate and learn. And this effect increases the longer the mat is used.

Sensors activate muscles and circulation.

The standing mat stimulates the reflex zones, the musculature and the circulation. It's just like walking in a forest.

Foot massage included.

The Aeris Muvmat relieves the legs and the whole body. People at standing workstations are able to stand for longer periods of time without tiring or discomfort. The Muvmat makes work feel like a walk in the woods.

Creativity on two legs.

Unlike standing on smooth ground, standing on the Aeris Muvmat boosts creativity. This is where good ideas come from.

Relaxed and improved posture.

On the Aeris Muvmat, your posture is demonstrably improved. This leads to a relaxation of the neck and shoulder muscles.

- 01. **Comfort zone:** relief through elastic and highly resilient integrated black foam.
- 02. **Active zone:** Topographical 3D structure, activates body and mind.
- 03. **Safe to stand on** thanks to beveled edging.
